- Proven ability to work successfully in teams

EDUCATION/CERTIFICATION

Associate of Applied Science in Internet Information Systems Technology, 2003
Twin Peaks Technical College, Twin Peaks, CA

Relevant Courses Completed:

- Extensive programming courses
 - Server design
 - Database management, network security
 - Internet imaging
- **Microsoft Certified Database Administrator (MCDBA)**

WORK EXPERIENCE

National Geographic Information Center, Boise, ID
Assistant Webmaster, Summer 2001 and Summer 2002

Updated the main databases and maintained a public Internet interface using Macromedia Dreamweaver and Active Server Pages (ASP). Created and more efficiently redesigned several branched sites including photo galleries, statistics tables, and pdf document posting areas and archives. Produced geologic prediction analysis graphs using information gathered from remote automated geology stations. Designed a web interface for LAN bandwidth usage tracking, improving network efficiency by 45%.

- ***On-the-Spot Award** received for extra effort during the Geographic Festival, 2002*

Jack Lane Construction and Development, Boise, ID
Web Design Project, Summer 2002

Created entire web site for a small business in construction and land development training, which included setup, design, site registration, and site hosting.
